Bagas Setiaji

FullStack Developer | Cilacap | stjbagas28@gmail.com | 087729723438

SUMMARY

Fullstack Software Engineer with over 3 years of experience in architecting, developing, and deploying scalable web and mobile applications. Skilled in creating sophisticated frontend interfaces using React, SolidJS, and Angular, alongside backend service development with Go and Rust. Experienced in designing RESTful APIs, modeling database schemas, and implementing modern software engineering methodologies. Committed to delivering high-quality, maintainable, and user-focused solutions by combining technical proficiency with strategic problem-solving. Actively enhancing expertise in system architecture and AI-enhanced development to engineer robust, scalable software systems.

EDUCATION

TELKOM UNIVERSITY
Bandung

Bachelor of Informatics Engineering
September 2024 - Present

- Studying core computer science subjects including Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Computer Networks, Operating Systems, Software Engineering, and Web Development.
- Gained practical experience in programming using Java, C++, Go, and Python through coursework and software development projects.
- Applied networking concepts using Wireshark for network traffic analysis, protocol inspection, and troubleshooting.
- Developed applications and implemented software engineering principles through individual and team-based projects.

SMK TELKOM PURWOKERTO
Purwokerto

Vocational High School – Network Access Engineering (Teknik Jaringan Akses)
July 2019 - May 2022

- Completed an industry-based Teaching Factory program at WITEL Purwokerto (Sep 2021 – Dec 2021).
- Developed practical skills in computer networking, network infrastructure, and telecommunications systems.

EXPERIENCE

SOFTWARE ENGINEER
Indonesia

PT. DECOM FENO MAHAKA
December 2025 - Present

- Designed and developed a comprehensive golf scoring platform for web, mobile, and tablet applications, enabling real-time score tracking and player statistics management.
- Architected a tournament management system supporting player registration, scheduling, scoring, and live leaderboard synchronization.
- Developed a golf course management system to streamline daily operations, tee-time scheduling, and administrative workflows.
- Built scalable backend services and responsive frontend applications with real-time synchronization across multiple devices.
- Collaborated with stakeholders to translate business requirements into reliable, maintainable, and user-friendly software solutions.

Technologies: SolidJS, Go, Reactjs , React Native ,Convex , PostgreSQL, Docker, REST API

FULLSTACK SOFTWARE ENGINEER
Purwokerto

PT. Smartelco Solusi Teknologi
December 2024 - Present

- Developed a native Workspace Management mobile application using Kotlin and Jetpack Compose with a focus on performance and modern Android UI.
- Built a real-time enterprise communication platform using React and Go, supporting secure messaging and scalable backend services.
- Designed and implemented AI-powered document processing solutions by integrating OCR technologies with Large Language Models (LLMs).
- Developed Telegram and WhatsApp automation bots using Python to streamline operational workflows and customer interactions.
- Collaborated across frontend, backend, and mobile development to deliver end-to-end software solutions.

Technologies: React, SolidJS, Go, Kotlin, Python, PostgreSQL, Docker

FULLSTACK SOFTWARE ENGINEER (FREELANCE)
Remote

ABISATYA BANGUN IMAN
February 2026 - March 2026

- Developed an end-to-end Hajj and Umrah management mobile application using Flutter, delivering a responsive cross-platform experience for pilgrims and administrators.
- Designed and implemented scalable backend services using NestJS
- Built and customized a Content Management System (CMS) to enable administrators to manage pilgrimage packages, schedules, announcements, and application content without requiring code changes.
- Integrated third-party APIs to support real-time notifications and operational workflows, ensuring reliable communication between users and administrators.

Technologies: Flutter, Dart, NestJS, TypeScript, Supabase, PostgreSQL, REST API

FRONTEND DEVELOPER
Jakarta / Cilacap

PT. Braincode Solutions
July 2022 - November 2024

- Developed enterprise dashboards and business applications using Angular and Angular Material.
- Built interactive data visualization features with AG Grid, AmCharts, Highcharts, DevExtreme, and Google Maps.
- Developed modern, responsive web interfaces using SolidJS, Tailwind CSS, and DaisyUI.
- Optimized frontend performance, resolved production issues, and improved application stability across enterprise projects.
- Collaborated with backend engineers and UI/UX designers to deliver maintainable and scalable web applications.

Technologies: Angular, SolidJS, TypeScript, Tailwind CSS, AG Grid, Highcharts, AmCharts, DevExtreme

TECHNICAL SKILLS & LANGUAGES

- Programming: JavaScript, TypeScript, Go, Python, Kotlin, Java, C++, Dart
- Frontend: React, SolidJS, Angular, Next.js, Tailwind CSS
- Backend: Go, NestJS, REST API
- Mobile: Flutter, Jetpack Compose
- Database: PostgreSQL, Supabase, SurrealDB , mySQL
- Tools: Docker, Git, Linux, Postman, Nginx
- AI & Networking: LLM Integration, OCR, Wireshark

Language

- Indonesian — Native
- English — Professional Working Proficiency
